### Wound Care

Apply dry gauze over open incision of left foot. Wrap foot with Kerlix up to ankle and secure. Wrap with ace bandage.

### VNS Instructions

Apply dry gauze over open incision of left foot. Wrap foot with Kerlix up to ankle and secure. Wrap with ace bandage.

### Activities

- You may shower/bathe and use a mild soap to gently cleanse the area but do not soak or scrub your foot
- You may ambulate as tolerated, bearing weight on your heel.

## Instructions (continued)

### **Diet**

May resume regular diet. Drink plenty of water to stay hydrated - 8 to 12 cups a day. Take stool softeners as needed to prevent constipation.

NOTIFY YOUR PHYSICIAN AND REPORT TO EMERGENCY DEPARTMENT IF YOU NOTICE ANY OF THE FOLLOWING:

- Temperature greater than 101 degrees
- Nausea, vomiting, or abdominal distention
- Unusual or excessive pain unrelieved by pain medication.
- If wound becomes malodorous or draining pus.
- Chest pain or shortness of breath

## Patient/Representative After Visit Summary Acknowledgement

- By signing this document I acknowledge receipt of all pages of the After Visit Summary. I also understand the information provided in these discharge instructions, including follow-up information, should be followed in order to ensure proper ongoing treatment of my diagnosis(es).
- A member of my treatment team has reviewed the discharge instructions provided to me and has answered any questions I may have had regarding these instructions.
